BENTHEM CROUWEL ARCHITECTS

Ir. JOOST VOS
ARNHEM, 1972
PARTNER, ARCHITECT

CURRICULUM VITAE

Joost Vos graduated as engineer from the Faculty of Architecture at Delft University of Technology in 1996. In 1997 he started his career as an architect in Amsterdam; first at Greiner van Goor Architecten, and after he joined at Benthem Crouwel Architects in the same year. In 2005 Joost Vos became a partner at the office. He is a member of the Royal Institute of Dutch Architects (bna).

From his experience with extraordinary projects such as the Anne Frank House, Stedelijk Museum of Modern and Contemporary Art, Amsterdam Central Station and the North / South metro link in Amsterdam, he is able to approach complex processes in a very elementary way. One of his recently completed projects is a law faculty, the Grotius building on the campus of the Radboud University in Nijmegen, which has been called a “refined pavilion in the park.” In summer 2017 the second data center for Equinix will be completed on Science Park Amsterdam, which the Dutch newspaper De Volkskrant called: “A Temple of the 21st Century”.

Joost Vos has given public lectures in the Netherlands and abroad, including Amsterdam, Delft, Eindhoven New Dehli (India) and Weimar (Germany).
