BENTHEM CROUWEL ARCHITECTS

Ir. JOOST VOS  
ARNHEM, 1972  
PARTNER, ARCHITECT

## CURRICULUM VITAE

Joost Vos graduated as engineer from the Faculty of Architecture at Delft University of Technology in 1996. In 1997 he started his career at Benthem Crouwel Architects. Joost Vos became a partner at the office in 2005. He is a member of the Royal Institute of Dutch Architects (bna).

From his experience with extraordinary projects such as the Anne Frank House, Stedelijk Museum of Modern and Contemporary Art, Amsterdam Central Station and the North/South metro link in Amsterdam, he is able to approach complex processes in a very elementary way.

One of his recently completed projects is a university faculty of law, the Grotius building on the campus of the Radboud University in Nijmegen, which has been said to be a “refined pavilion in the park.” A second data center for Equinix - AM4, next to AM3 (2012) - has been completed on Science Park Amsterdam this summer, which the Dutch newspaper De Volkskrant called: “A Temple of the 21st Century”. End of 2019, Museum Arnhem will be restored to its former glory (1873), and a new impressive cantilevered extension will open.

Joost Vos has given public lectures and has been an international award’s jury member in the Netherlands and abroad, including Amsterdam, Delft, Eindhoven, New Dehli (India), Weimar, Dessau/Bauhaus and Düsseldorf (Germany), Seoul (South Korea).
